

APSEC 2026

Dec 7 - 10, 2026 Bali, Indonesia

CALL FOR PAPER »»

The 33rd Asia Pacific Software Engineering Conference (APSEC) has long been established as a leading regional conference that gathers researchers and practitioners from academia, industry, and government to exchange knowledge and best practices in software engineering, and to address emerging challenges and solutions in software engineering innovation. **The 33rd APSEC will be held on December 7-10, 2026, in Bali, Indonesia.** APSEC 2026 will continue in the tradition of previous editions of this regional conference. As in past APSEC series, the main research track features the most recent and significant innovations in the field of software engineering and all its sub-disciplines. APSEC 2026 also invites submissions of high-quality research papers that describe original and unpublished results on theoretical and empirical software engineering research topics.

SCOPE

The APSEC 2026 technical research track invite high-quality submissions describing original and unpublished results on theoretical, empirical, or experimental software engineering research. Submissions must present novel contributions that advance the state of the art in the field.

Requirements Engineering

- Elicitation, specification, analysis, validation, and management
- Requirements for emerging systems (AI, cyber-physical, etc.)

Software Architecture and Design

- Architectural modeling, patterns, and decision-making
- Component-based, service-oriented, and microservices architectures

Testing and Verification

- Automated testing, test generation, and oracles
- Model checking, theorem proving, symbolic execution, and runtime verification

AI for Software Engineering

- Machine learning and AI techniques to support code generation, testing, debugging, refactoring, and maintenance
- Intelligent tools, recommendation systems, and automation in SE

Software Engineering for AI

- Methods, processes, and tools for developing, deploying, and maintaining reliable AI/ML systems
- Quality assurance, testing, and evolution of AI-enabled software

Security

- Secure software development, vulnerability detection and mitigation
- Privacy-preserving techniques, secure-by-design approaches

Software Maintenance and Evolution

- Refactoring, program comprehension, reverse engineering
- Legacy system migration, technical debt management, and long-term evolution

Evaluation Criteria

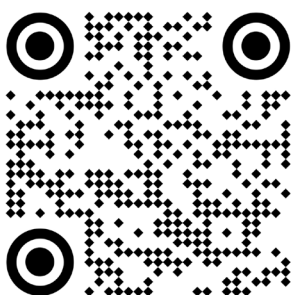

Technical research papers must not exceed **10 pages** (including references; check final guidelines for exact limits). Submissions will be evaluated by at least three program committee members based on novelty, originality, technical soundness, significance to the field, proper use of research methods, clarity of presentation, and relevance.

Accepted Papers

All accepted papers will be published in the conference proceedings and submitted for inclusion in **IEEE Xplore**, ensuring wide dissemination and archival visibility. Authors must register and present their work at the conference; failure to do so may result in removal from the proceedings. No changes to author lists or titles are allowed post-acceptance without Program Co-Chairs' approval. Selected papers will be invited to submit extended version to our affiliated journal, the Automated Software Engineering (AUSE) Journal's special issue (APSEC 2026)*

Submission Instructions

- All submissions must be original and not previously published or under review elsewhere.
- Papers must be in **English**, PDF format, A4 size, and conform to the **IEEE Conference Proceedings Formatting Guidelines** (title in 24pt font, full text in 10pt; LaTeX users: `\documentclass[10pt,conference]{IEEEtran}` without compsoc options). Submissions must comply with the IEEE Policy on Authorship.
- The review process is **double-blind**: authors must not reveal their identities in the paper (see double-blind instructions carefully).
- The Chairs reserve the right to desk-reject non-compliant or out-of-scope submissions.

Workshop Proposal Submission
Abstract Submission
Paper Submission
Tutorial Submission
Author Notification
Camera-Ready

Deadline : July 6, 2026
Deadline : July 6, 2026
Deadline : July 13, 2026
Deadline : August 24, 2026
Deadline : September 14, 2026
Deadline : October 19, 2026
